Advantages

Through the visual
representations readers
Can give valuable insights
into crop production

User friendly in environment

Purely hydrated crops are
cultivated and sold to the users

Disadvantages

Seasonal variations
is the main defect

It enable the visualization
of intuitive analysis

Amount of interest is high
when compared to the profit.

CONCLUSION

We start empathy and brainstorming through mural.com

We developed worksheet, dashboard,story using our project data set collect.

Open tablue public account for my team

And I uploaded all my Worksheet,dashboard,story on my tablue public account.

And we make a project report for Indian's Agricultural crop production Analysis project

Finally all my projects has been submitted in my git hub account
